Learning Objectives:

- Identify at least two barriers to immunizing adults.
- Describe how to leverage the multi-task practice transformation to improve immunization rates.
- Identify at least two strategies to improve collaboration between clinicians and pharmacies.
- Describe at least two techniques used to improve immunization rates of healthcare workers.

Outcome Statement:

The purpose of this session is to prepare healthcare quality improvement professionals to identify and implement effective healthcare strategies by exploring promising practices to improve patient and healthcare worker immunization rates.

We expect that this experience will help participants demonstrate and promote successful delivery of care practices and identify opportunities for improvement, all of which may promote advances in care that impact the Medicare beneficiaries served by the work of the QIO Program.
