

2017 QIO PROGRAM PROGRESS REPORT

Year in Numbers

Spotlight on key QIN-QIO data and results achieved during the past year

CARDIAC HEALTH

 **2,700+**
practices recruited, representing
9,600+ clinicians

 **2,000+**
recruited practices implementing
blood pressure protocols

 **64.2%**
blood pressure control rate
achieved, exceeding the
30% target

MEDICATION SAFETY

 **2.3M+**
beneficiaries at high risk for an
adverse drug event (ADE) screened
for ADE

 **1.4M+**
medication-related adverse
outcomes were identified for
opportunities of harm avoidance
(potential ADEs)

 **15,600+**
severe ADEs avoided in the
Medicare high risk population

NURSING HOME CARE

 **12,200+**
nursing homes recruited
(more than 78% of all nursing
homes in the U.S.)

 **26%**
relative improvement reduction
in antipsychotic medication use
has been achieved among nursing
homes across the nation

 **54,500+**
fewer long-stay nursing
home residents who received
unnecessary antipsychotic
medications on a quarterly basis
