

Why I Got Vaccinated

"I feel it's my responsibility to protect others and myself and we do that by getting vaccinated. Combatting Covid-19 effectively will take everyone's help! Also, I work on the front lines as a counselor in an inpatient geriatric psychiatric unit and want to protect the individuals I serve."

*Charlene Atkins, MS, LPC, Licensed Professional Counselor/
Director of Social Services, HCA/Bridges Senior Behavioral
Health Unit at Western Missouri Medical Center*

"I wanted to protect myself, my loved ones, and those in my care. I enrolled in the Pfizer study because I saw how awful this virus was and wanted to help ensure better outcomes for the future."

Kate Smith, RN, Infection Preventionist, Manor Grove

"I saw first hand the impact the coronavirus had on the residents, their families and the staff. I realize some individuals do not get ill from COVID-19 (I had not one symptom) however I saw the devastation and horror it did do to some individuals. As a nurse I want to be able to provide excellent care, if that means taking a vaccine that science has deemed safe, then I will do it over and over again."

*Tammy Harr, Assistant Director of Nursing, Infection
Preventionist, Maple Lawn Nursing Home*
