

## Chronic Kidney Disease (CKD) Risk Factors, Treatment and Health Equity Panel – Part 2

### Event Information

**Date:** Tuesday, June 28, 2022

**Time:** 1:30-3 pm MST | 2:30-4 pm CST

**Who should join?** Clinicians (including primary care physicians, nephrologists, nephrology nurses and other advanced practitioners), executive leadership, hospitals, social workers, community-based organizations, patients and families

#### Event Description:

[1 in 3 adults](#) in America are at risk of life-threatening kidney disease, and most don't know it. In this multi-disciplinary panel discussion, clinical, public health, research and community-based experts will explore evidence-based and emerging practices in CKD. Even if you missed Part 1, don't hesitate to join us! For Part 2, we will advance our exploration of best practices in care, treatment and prevention, health equity at all levels of health services, and community and patient advocacy.

#### Objectives:

- Raise awareness of the prevalence, frequency and distribution of chronic kidney disease, especially among vulnerable populations.
- Review and further explore causal factors in inequitable outcomes from CKD.
- Highlight best, promising, emerging and evidence-based practices for involving community in understanding CKD risk factors and resources, and self-management.
- Provide an opportunity for Telligen QI Connect™ partners to network and share best practices with others focusing in this area.
