

The Centers for Disease Control and Prevention (CDC) National Training Collaborative for Healthcare Infection Control

PROJECT FIRSTLINE

Note

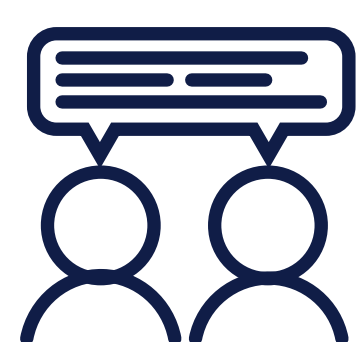

All videos can be downloaded for upload to the hospitals learning management system.

Training Toolkits

These toolkits are for hospital educators and/or Infection Preventionists to use to train the hospital staff and come with a facilitator guide, session feedback form, and facilitator self-assessment form. Each session comes complete with a downloadable session plan, PowerPoint presentation and participant booklet.

Learn More: <https://rb.gy/3avese> (Link)

Lead a Training

Each session comes with a session plan and PowerPoint slides for a 60, 20 or 10 minute training to meet your needs.

Inside Infection Control

This training plan is part of CDC's Project Firstline. To stop the spread of infectious disease threats, it's important not only to have this foundational knowledge, but to understand and be ready to implement infection control protocols and procedures throughout the work day, including during every patient care activity and healthcare interaction.

NOTE: Continuing education credits available.

Interactive Resources

Check your infection control knowledge and gain valuable feedback in real time with our interactive, educational infection control resources.

Learn More: <https://rb.gy/5acvhh> (Link)

Scavenger Hunt

This scavenger hunt was developed to promote awareness of Project Firstline, the new materials, and posters. By participating in the scavenger hunt, participants will gain knowledge of basic infection control.

Educational Videos

Watch Project Firstline's educational videos to learn about different infection control topics, such as respiratory droplet basics and safe use of multi-dose vials.

Learn More: <https://tinyurl.com/95kpdfsd> (Link)

Micro Learns

The micro-learns are a series of guided discussions that connect infection control concepts to immediate, practical value, so healthcare workers can recognize infection risks and take action to stop the spread of germs.

Learn More: <https://tinyurl.com/53z8enxx> (Link)

Videos + Social Media

Check out these videos to learn the basic ideas behind risk recognition, where germs live, and how infection control in healthcare is an important way to protect your patients, yourself, and your coworkers.
