A Review of Patient Activation & Prescription Drug Monitoring: Resources to Enhance Medication Management with Patients

Wednesday, October 11, 2017 • 3:00 – 4:30 PM ET

This event is open to **beneficiaries, families, healthcare providers, practitioners, partners, and Quality Innovation Network-Quality Improvement Organizations.**

Join this event to learn about the utilization of two resources – the **Patient Activation Measure (PAM)** and **Prescription Drug Monitoring Programs (PDMPs)**. Hear from local QIN-QIOs that have supported providers in their use of the PAM and PDMPs and understand how these resources are beneficial for both patients and providers. Also, hear from the National Association of Boards of Pharmacy (NABP) to understand universal functions of PDMPs across the nation and how providers can leverage PDMP data to improve medication safety.

Learning Objectives:

- Understand what the Patient Activation Measure (PAM) is and how to apply the resource.
- Explain the importance of a Prescription Drug Monitoring Program (PDMP) and how to utilize within your practice.
- Provide access to training and resources for individual state PDMPs.
- Explain the application and potential patient outcomes associated with both the PAM and PDMP.
